SUMMARY

Analytical and detail-oriented Computer Science postgraduate student pursuing an M.Tech in Computer Science Engineering, with a B.Tech in Artificial Intelligence and Data Science and hands-on experience in data analytics, machine learning, and data visualization. Proficient in Python, SQL, Excel, and Tableau, with practical experience in predictive modeling, natural language processing, time-series analysis, and dashboard development. Completed a six-month Data Analyst internship at Unified Mentor and developed projects spanning machine learning, deep learning, and data-driven application development. Passionate about solving real-world problems through data-driven insights and continuously expanding technical expertise through practical projects.

TECHNICAL SKILLS

- **Languages**: Python, MYSQL, HTML, CSS, JavaScript.
- **Tools**: Microsoft Excel, VBA, Tableau, Flask, REST APIs, Web Scraping, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, NLTK, Neural Networks, Jupyter Notebook, VS Code, MySQL Workbench.
- **Skills**: Data Cleaning & Preprocessing, Exploratory Data Analysis, Feature Engineering, Statistical Analysis, Supervised & Unsupervised Learning, Classification, Regression, Ensemble Learning, Deep Learning, Neural Networks, Natural Language Processing (NLP), Predictive Modeling, SQL Queries & Optimization, Dashboard Development, Data Visualization.

PROJECTS

Sentiment Analysis Using Twitter Data | GITHUB

Developed an end-to-end NLP-based machine learning system to classify Twitter text into positive and negative sentiment. Built and deployed a Flask web application enabling real-time sentiment prediction using a trained ML model.

- Role: Implemented text preprocessing and TF-IDF feature extraction, trained and evaluated ML models, serialized the final model, and integrated it with a Flask backend and HTML/CSS frontend
- Tools: Python (Pandas, NumPy, Scikit-learn), NLP (NLTK, TF-IDF), Flask, HTML/CSS, Pickle, Jupyter Notebook, VS Code, Anaconda.

20 Machine Learning Projects | GITHUB

Developing an ongoing collection of machine learning projects focused on applying predictive modeling, natural language processing, deep learning, and data analytics to real-world problems. The collection explores diverse applications, including financial forecasting, sentiment analysis, image classification, recommendation systems, and social media analytics.

- Role: Implementing data preprocessing, exploratory data analysis, feature engineering, model development, evaluation, and visualization across projects involving diverse datasets and machine learning techniques.
- Tools: Python, Pandas, NumPy, Scikit-learn, TensorFlow/Keras, NLTK, Matplotlib, Seaborn, Jupyter Notebook.

Coffee Shop Sales Analysis | GITHUB

Analyzed coffee shop sales performance using Python and SQL to uncover revenue drivers, customer behavior, and prepare data for predictive modeling. Implemented EDA, forecasting prep, and customer-level insights with both Python and SQL approaches.

- Role: Designed end-to-end pipeline, performed SQL queries (CTEs, window functions), feature engineering, and built forecasting-ready dataset. Contributed to both Python notebook and SQL implementation.
- Tools: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL, Jupyter Notebook.

PROFESSIONAL EXPERIENCE

Unified Mentor – Remote
Data Analyst Intern **March 2025 – August 2025**

- Collected, cleaned, and validated structured and unstructured datasets, ensuring accuracy and consistency for analysis.
- Conducted exploratory data analysis (EDA) and applied statistical methods using Python (Pandas, NumPy, Matplotlib, Seaborn) to uncover trends, correlations, and actionable insights.
- Applied machine learning techniques (classification, regression**,** and time-series forecasting) to build predictive models and evaluate business outcomes.
- Utilized SQL, Python, and Excel for advanced data manipulation, querying, and automated reporting.
- Designed and developed interactive dashboards in Tableau to monitor KPIs, track performance, and support data-driven decision-making.
- Collaborated with cross-functional teams to deliver end-to-end analytical solutions and provide strategic recommendations for reporting improvements.

CERTIFICATIONS

- **Data Visualization in Tableau & Python** – Udemy
- **Data Science Job Simulation** – BCGX (Forage)
- **Advanced Microsoft Excel & VBA** – Udemy
- **Data Analytics Essentials** – Cisco Networking Academy

EDUCATION

KG REDDY COLLEGE OF ENGINEERING & TECHNOLOGY **Hyderabad, India**
M.tech, Computer Science Engineering ***10/2026 – Present***

SHADAN COLLEGE OF ENGINEERING & TECHNOLOGY **Hyderabad, India**
B.tech, Artificial Intelligence & Data Science – 7.08 CGPA ***08/2023 – 06/2026***

MAHAVEER INSTITUTE OF SCIENCE & TECHNOLOGY **Hyderabad, India**
Diploma, Electrical & Electronics Engineering – 7.83 CGPA ***10/2020 – 04/2023***
